

COEN 240 Machine Learning

Homework #5

Name: Alex Cherekdjian

Student ID: 00001083236

Problem 1

IVE STAR:
★★★★★

1.1
Uncertainty before = $-\frac{1}{2} \log_2 \frac{1}{2} - \frac{1}{2} \log_2 \frac{1}{2} = 1$
Uncertainty after:

$$\begin{aligned} H(C|Hardness) &= \frac{4}{8} H(C|hard) + \frac{4}{8} H(C|soft) \\ &= \frac{4}{8} H\left(\frac{3}{4}, \frac{1}{4}\right) + \frac{4}{8} H\left(\frac{1}{4}, \frac{3}{4}\right) \\ &= \frac{4}{8} \cdot \left(-\frac{3}{4} \log_2 \frac{3}{4} - \frac{1}{4} \log_2 \frac{1}{4}\right) + \frac{4}{8} \cdot \left(-\frac{1}{4} \log_2 \frac{1}{4} - \frac{3}{4} \log_2 \frac{3}{4}\right) \\ &= 0.5 \end{aligned}$$

$$\begin{aligned} H(C|Grain) &= \frac{4}{8} H(C|small) + \frac{4}{8} H(C|large) \\ &= \frac{1}{2} \left(-\frac{1}{2} \log_2 \frac{1}{2} - \frac{1}{2} \log_2 \frac{1}{2}\right) + \frac{1}{2} \left(-\frac{1}{2} \log_2 \frac{1}{2} - \frac{1}{2} \log_2 \frac{1}{2}\right) \\ &= \frac{1}{2} (1) + \frac{1}{2} (1) = 1 \end{aligned}$$

$$\begin{aligned} H(C|Density) &= \frac{6}{8} H(C|Heavy) + \frac{2}{8} H(C|light) \\ &= \frac{6}{8} \left(-\frac{3}{6} \log_2 \frac{3}{6} - \frac{3}{6} \log_2 \frac{3}{6}\right) + \frac{2}{8} \left(-\frac{1}{2} \log_2 \frac{1}{2} - \frac{1}{2} \log_2 \frac{1}{2}\right) \\ &= \frac{6}{8} (1) + \frac{2}{8} (1) = 1 \end{aligned}$$

Hardness will be chosen as the root.

$$H(C|Grain, hard) = \frac{1}{2} H\left(\frac{1}{2}, \frac{1}{2}\right) + \frac{1}{2} H\left(\frac{1}{2}, \frac{1}{2}\right) = 1$$

$$H(C|Grain, soft) = \frac{1}{2} H\left(\frac{1}{2}, \frac{1}{2}\right) + \frac{1}{2} H\left(\frac{1}{2}, \frac{1}{2}\right) = 1$$

$$H(C|Density, hard) = \frac{3}{4} H\left(\frac{1}{2}, \frac{1}{2}\right) + \frac{1}{4} H(0, 1) = 0$$

$$H(C|Density, soft) = \frac{3}{4} H(0, 1) + \frac{1}{4} H\left(\frac{1}{2}, \frac{1}{2}\right) = 0$$

Problem 2

2a) $H(\text{Target Species}) = H(\frac{1}{2}, \frac{1}{2}) = \boxed{1 \text{ bit}}$

2c) $H(S | \text{Height}) = \frac{4}{10} H(\frac{1}{2}, \frac{1}{2}) + \frac{6}{10} H(\frac{3}{6}, \frac{3}{6})$
 $= \frac{4}{10} (1) + \frac{6}{10} (1)$
 $= \boxed{1}$

2d) $H(S | \text{Green}) = \frac{5}{10} H(\frac{4}{5}, \frac{1}{5}) + \frac{5}{10} H(\frac{1}{5}, \frac{4}{5})$
 $= \frac{1}{2} (-\frac{4}{5} \log_2 \frac{4}{5} - \frac{1}{5} \log_2 \frac{1}{5}) + \frac{1}{2} (-\frac{1}{5} \log_2 \frac{1}{5} - \frac{4}{5} \log_2 \frac{4}{5})$
 $= \boxed{0.722}$

2e) $H(S | \text{Legs}) = \frac{3}{10} H(\frac{2}{3}, \frac{1}{3}) + \frac{7}{10} H(\frac{4}{7}, \frac{3}{7})$
 $= \frac{3}{10} (-\frac{2}{3} \log_2 \frac{2}{3} - \frac{1}{3} \log_2 \frac{1}{3}) + \frac{7}{10} (-\frac{4}{7} \log_2 \frac{4}{7} - \frac{3}{7} \log_2 \frac{3}{7})$
 $= \boxed{0.9651}$

2f) $H(S | \text{Smelly}) = \frac{3}{10} H(\frac{2}{3}, \frac{1}{3}) + \frac{7}{10} H(\frac{4}{7}, \frac{3}{7})$
 $= \frac{3}{10} (-\frac{2}{3} \log_2 \frac{2}{3} - \frac{1}{3} \log_2 \frac{1}{3}) + \frac{7}{10} (-\frac{4}{7} \log_2 \frac{4}{7} - \frac{3}{7} \log_2 \frac{3}{7})$
 $= \boxed{0.9651}$

2g) Green, since it has the smallest entropy value & thus the most information gain of all the other attributes.

$$2h) \quad H(S|Legs, yes) = \frac{1}{5} H(\overset{2}{0}, \overset{1}{1}) + \frac{4}{5} H(\overset{3}{\frac{4}{4}}, \overset{0}{0})$$

$$= 0$$

$$H(S|Smelly, yes) = \frac{2}{5} H(\overset{1}{\frac{1}{2}}, \overset{1}{\frac{1}{2}}) + \frac{3}{5} H(\overset{2}{\frac{2}{3}}, \overset{0}{\frac{0}{3}})$$

$$= \frac{2}{5} = 0.4$$

$$H(S|Height, yes) = \frac{2}{5} H(\overset{small}{\frac{2}{2}}, \overset{0}{\frac{0}{2}}) + \frac{3}{5} H(\overset{tall}{\frac{2}{3}}, \overset{1}{\frac{1}{3}})$$

$$= \frac{3}{5} (-\frac{2}{5} \log_2 \frac{2}{5} - \frac{1}{5} \log_2 \frac{1}{5})$$

$$= 0.551$$

choose "Legs" for "Green = yes"

$$H(S|Legs, No) = \frac{2}{5} H(\overset{2}{\frac{1}{2}}, \overset{1}{\frac{1}{2}}) + \frac{3}{5} H(\overset{3}{0}, \overset{1}{1})$$

$$= \frac{2}{5} = 0.4$$

$$H(S|Smelly, No) = \frac{1}{5} H(\overset{1}{1}, \overset{0}{0}) + \frac{4}{5} H(\overset{2}{0}, \overset{4}{\frac{4}{4}})$$

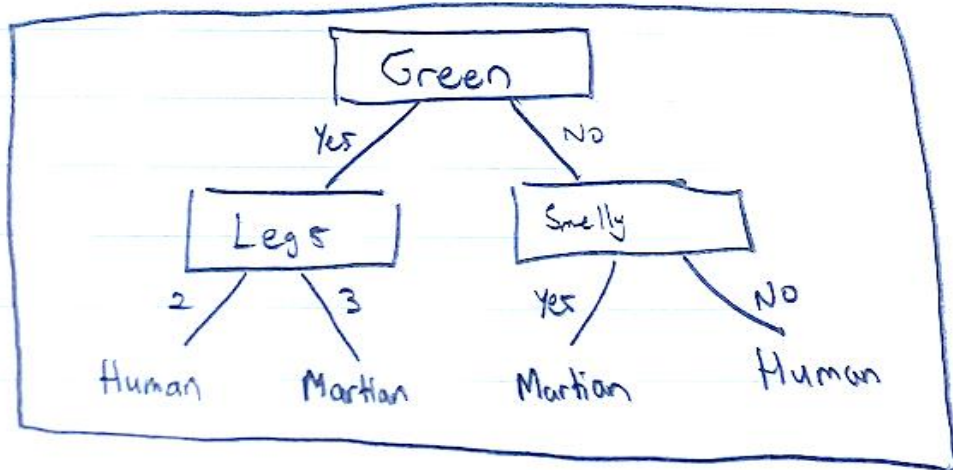

$$= 0$$

$$H(S|Height, No) = \frac{2}{5} H(\overset{small}{\frac{0}{2}}, \overset{2}{\frac{2}{2}}) + \frac{3}{5} H(\overset{tall}{\frac{1}{3}}, \overset{2}{\frac{2}{3}})$$

$$= \frac{3}{5} (-\frac{1}{3} \log_2 \frac{1}{3} - \frac{2}{3} \log_2 \frac{2}{3})$$

$$= 0.551$$

choose "Smelly" for "Green = no"
